Note:

CDC Screening Option 1:

Women are considered screened under the CDC program if their clinical services were provided all or in part by CDC Title XV funds. CDC Title XV grantees are those entities receiving funds under a cooperative agreement with CDC to support those activities related to the National Breast and Cervical Cancer Early Detection Program.

In addition to the above-required screening option, states may choose one or both of the following:

CDC Screening Option 2:

Women who are screened under a state Breast and Cervical Cancer Early Detection Program in which their particular clinical service was not paid for by CDC Title XV funds, but the service was rendered by a provider and/or an entity funded at least in part by CDC Title XV funds, and the service was within the scope of a grant, sub-grant or contract under that state program and the CDC Title XV grantee has elected to include such screening activities by that provider as screening activities pursuant to CDC Title XV; or

CDC Screening Option 3:

Women who are screened by any other provider and/or entity and the CDC Title XV grantee has elected to include screening activities by that provider as screening activities pursuant to CDC Title XV. For example, if a family planning or community health center provides breast or cervical cancer screening or diagnostic services to low-income women, but does not receive CDC funds from the CDC Title XV grantee to support these services, the CDC Title XV grantee would have the option of including these providers' screening activities as

part of their overall screening program. The CDC Title XV grantee may require any provider deemed part of the overall screening program to follow program guidelines.
